WORLD NEWS IN PICTURES

Canadian National Exhibition Winners

ERIBELL AUGUSTA SIM, first prize senior yeasting and grand champion Shortbush female at the C.N.E. in Toronto, is owned by P. P. Lane, Wexford, Ontario.

GLENGARRY WEE MAGGIE, grand champion Ayrshire female shown at the C.N.E. by Stansell Brothers, Ayrmer, Ontario.

The grand and reserve grand champion Tanworth cows were shown by F. W. Treven, Stratford, Ont.

WERNER ROMAHN, Petersburg, Ont., showed this champion pin of expert flocks right.

A. O. SCHILLING, internationally known poultry artist with the best male at the C.N.E. poultry show—the champion White Rock cock—shown by Latta and Son, Simcoe, Ont.

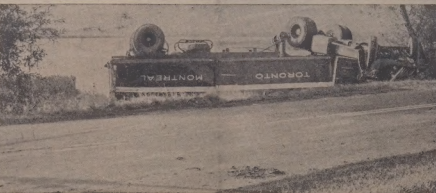

The poultry entries at the C.N.E. made a good showing. The black Langshan cock, at left, was reserve champion for C. A. B. Tilt, Doron, Ont., weighing about 11 pounds; pose with the champion Blue Comb Black Brahma (shown), owned by A. and P. Abner, Toronto (weight about 13 pounds).

The best pullet and the best female at the Canadian National Exhibition in Toronto poultry show were the White Wyandotte, owned by M. Vesta, Woodville, Ont.

SEPTEMBER STRAWBERRIES—Left: W. O. Creighton, "Strawberry King" of Picton County, N.B., and, (centre), September berries ready for shipment. Right: Close cultivation and absence of runners is the key to good strawberry plant production. Inset: A heavily-loaded plant.

DRIVER TRIED TO AVOID ACCIDENT, BUT SCHOOLBOY KILLED—Although he was traffic-cautious, Gerald Wayne Baker, of Cornwall, Ont., was killed by a transport while journeying to school. The young boy had been given a ride to school by Gerald Douglas, dairy driver, who let him out at edge of road across from school, cautioning him about coming. Lad waited for one truck to pass but walked out in front of following transport. Driver attempted to avoid hitting lad by turning his vehicle upside down in ditch, as shown, but it was of no avail.—S.N.S. photo.

CHAMPIONS—Left: After winning several junior championships for Gilbert E. Arnold, Grenville, P.Q., this Young Electric stallion, Kingston, A. R. Jay Paterson, took senior and grand champion titles at the National Exhibition. Right: Champion Pemberton mare was Colleen East, shown by J. J. Jones.

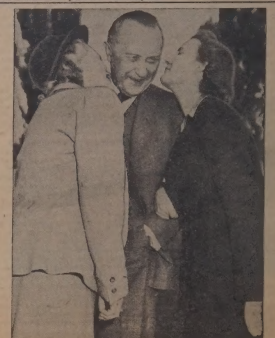

HE FINALLY LANDED IT—Smiling proudly as his big catch is hauled aboard, Tony Hulman, of Terre Haute, Ind., nation, fought with this beauty over an hour before he landed it. Tony is a member of U.S. team which won International Tuna Tournament at Waikiki, N.H. American retained fishing trophy against opposition from Britain, Canada, Cuba, Argentina.—S.N.S. photo.

CHARGE EX-FUGITIVE AFTER DEATH PROBE—Charges have been laid by attorney-general's department against Tony Demers, 32, former National Hockey league player, in connection with death of Mrs. Anita Robert, 21, of Oakville, Ont. Judged criminally responsible for the woman's death by a six-man coroner's jury, Demers will appear in court at Sherbrooke, Que., for arraignment. Mrs. Robert died in hospital at Montpelier, Que., shortly after she was brought there by Demers. Battered and bleeding, she appeared to have received a severe beating.—S.N.S. photo.

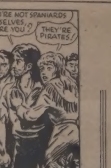

RESISTING ATTACKS—Persian encampments, complete with berber, trenches, are being used by Persian troops in resisting attacks made by Russian soldiers near the border of the two countries. Reason given for the attacks was the refusal of the Persian authorities to give up a Russian officer and soldier who had taken refuge across the border. The Russians attacked one of the border posts and captured 40 officers and 70 soldiers as hostages. Later they made further advances towards the Hafidzalla area, which is rich in oil potential.—S.N.S. photo.

CONGRATULATORY KISSES—Konrad Adenauer, elected first chancellor of Western Germany, gives congratulatory kisses from daughter, Label, 21, (left), and Lotta, 24. His daughter Lilla also serves as his secretary.—S.N.S. photo.

THANKFUL FOR SON'S SAFETY—Mrs. Mary Hightower of Baltimore, Md., and son Leo are shown after they had received a telegram telling birth of her son. Leo's escape from a Soviet prison in Berlin after more than 10 months of imprisonment. Mrs. Hightower bore him in 1944. She said her son had been seen three side through. In answer to the Russian contention that her son was a Soviet national, his mother said he was born in Baltimore and attended a public school there.—S.N.S. photo.

WORLD HAPPENINGS

BRIEFLY TOLD

A hall in memory of Mahatma Gandhi is to be built in Singapore containing a library of books on his life and teachings.

The 50th year of immigration in Western Canada was commemorated recently by unveiling a monument at Macleod, Alta.

Cable of sorting 600 letters a minute, Magna Rex machines are being developed at the Post Office Research Station, Delhi, India.

Gas well drilling recently in Italy's Po Valley, south of Milan, went out of control and could not be stopped for several weeks, wasting some \$500,000 cubic feet of gas per day.

The French government advised its fellow allies of the Atlantic pact it would like to see the military assistance clause of the treaty put into effect as soon as possible.

The Canadian navy is going to be a bit less salty. The traditional hammocks are being replaced by the banks and the mezzonins by a cafeteria in the destroyer H.M.C.S. Bonaventure.

Because their pals wanted pet rabbits, a cross male, and a cross female teenage boy's club members in Cambridge, Surrey, England, formed their own company to trade in "any thing that wriggles, hops, jumps, or swims."

Allen Crews, a theology student in the United States, has been granted one of 10 scholarships awarded by the Protestant Bible Commission of the United States. The award provides for a course in theology in Hollywood, Calif.

Westerners Win Lifesaving Medals

TORONTO—Two westerners have been named as recipients of the lifesaving medals for lifesaving.

Dale E. Spiering of Vancouver, B.C., won the award by rescuing his companion from a truck which went through fire on near Pine St. Mr. Spiering, 34, was killed.

The other award winner, Mrs. Beatrice M. McFarlane of Vancouver, plunged into the Fraser river last November to save three-year-old Clifford Gulliver.

Children usually reach the bloom of life at 10 or 12 years.

AT HOME BY THE FIRE

A HOME with a fireplace always brings more cheerfulness than any other. They are together with many people even though they may not be the most efficient means of heating a house. Here are drawings of a good fireplace design.

Requirements of materials depend largely on the size of the fire place. Therefore a bill of materials would have to be worked out for each size. The first main feature necessary for a successful fireplace is to have the fire area of the chimney in the correct ratio to the area of the opening in the front of the fireplace. The cross sectional area of the flue must not be less than 7/16 of the frontal opening of the fireplace.

Secondly, the smoke shaft at the bottom of the flue (shown in the accompanying plan) is absolutely essential to prevent back drafting in the chimney.

Third, the arch or breast overhanging the throat of the fireplace should be less than 8 inches in depth. Fourth, the throat of the fireplace should extend from the whole width of the fireplace opening.

The table of dimensions given in the plan clearly indicates the correct proportions of the various parts of a fireplace and gives the proper dimensions for the six important dimensions.

If the width of the opening in the front of the fireplace (A) is four feet, for instance, it is only necessary to glance at the table to obtain the correct measurements for the other five dimensions. From the table we find that the depth of the back of the fireplace (B) is 2 ft. 2 in., the height of the opening in the front (C) should be 3 ft. 2 in., the width at the back (D) should be 2 ft. 4 in., and the width of the throat (E) should be 2 ft.

It should also be mentioned that the chimney flue from a fireplace should not be used for any other heating units such as stoves and furnaces. Separate flues must be available for each.

The steel jacket used for circulating heat from a fireplace is a great improvement over the old style fireplace. Much more heat is supplied to the room with this new type of jacketed fireplace, but it is probably too new to find from such a fireplace to do all the heating for a house, even of four rooms. Such a job will probably require a furnace or some sort of heating stove as the main source of heat.

TABLE OF DIMENSIONS

PLAN	SECTION	SECTION	SECTION	SECTION	SECTION
A	B	C	D	E	F
4'0"	2'2"	3'2"	2'4"	2'2"	2'2"
4'0"	2'2"	3'2"	2'4"	2'2"	2'2"
4'0"	2'2"	3'2"	2'4"	2'2"	2'2"
4'0"	2'2"	3'2"	2'4"	2'2"	2'2"
4'0"	2'2"	3'2"	2'4"	2'2"	2'2"
4'0"	2'2"	3'2"	2'4"	2'2"	2'2"

These diagrams show the features of construction of a good brick fireplace, illustrating the chimney, the fireplace, and the foundation and damper arrangement which should be built into the basement. The table of dimensions must be followed.

There are far more efficient than living spaces of animals and birds.

Claimed The Spotlight

At the Chancellors, B.C. Fair, Chance Kettle from Vancouver, Wash., claimed the spotlight with his attractive six-year-old grey Percheron, shown here which was owned by the 50th year of immigration in Western Canada.

Dr. H. L. Collins of Columbia University has found that hamsters and other animals can be cured by hitting the stockings to the grille because the stockings are pulled too tight.

In an address to the fourth annual convention of the Canadian Association of Chiropractors, Dr. Collins said that animals of the horse and legs. He said nylon should only be used with cotton socks or cotton socks in the horse.

Dr. Collins estimated there are 100,000 persons with foot trouble in the United States. He said the feet and shins should be cleaned daily and both should be given plenty of fresh air.

Tight Stockings Cause Foot Trouble

WINNIPEG—A girl, never's more aware of an expert's don't wear nylon stockings.

West May Become Canada's Cotton Bowl As Tests Continue

MEDICINE HAT, Alta.—This southeastern Alberta city—western end of the prairie drought region—will be the heart of Canada's only cotton bowl if it retained blacksmith's dream comes true. The start of a long-term experiment in turkey cotton growing made in the district this year after Alderman Simon F. Scott returned from a trip to Texas with 100 pounds of seed.

The seed was planted in about 100 acres in the district—some in alfalfa and in some in cotton. The district is in an irrigated field and under the best of city plant nursery.

Although an early September frost has not yet appeared, the plants before the cotton are expected to be in good condition. The seed was planted in about 100 acres in the district—some in alfalfa and in some in cotton. The district is in an irrigated field and under the best of city plant nursery.

It is believed that the area within a 50-mile radius of Medicine Hat is the only district in Canada suited to cotton growing, which requires a 100-day season of mild weather with warm nights. The area's growing season is 10 to 15 days longer than most.

The cotton plants did remarkably well in their first year. A visit was made to see the plants. The seed was planted in about 100 acres in the district—some in alfalfa and in some in cotton. The district is in an irrigated field and under the best of city plant nursery.

It is believed that the area within a 50-mile radius of Medicine Hat is the only district in Canada suited to cotton growing, which requires a 100-day season of mild weather with warm nights. The area's growing season is 10 to 15 days longer than most.

Canadian Potato Crop Lighter

OTTAWA—Homeowners had better get ready for a leaner potato crop this year. The Canadian Horticultural Council has reported that the potato crop in 1934 was 11,000,000 bushels lighter than last year's crop of 12,100,000 bushels.

Because of the short supply and poor condition of this year's potato crop, the Council has advised growers to plant "consistently" as the season advances.

Production in the Maritime Provinces is expected to be about 10 per cent lower than last year. Prince Edward Island has a slightly larger crop, but it is about 10 per cent lower than last year's.

In Quebec potatoes are 3,000,000 bushels heavier than last year, and Ontario production is down an estimated 4,000,000 bushels.

The crop on the prairies, particularly in Alberta, is below last year's. British Columbia has a crop of about 10,000,000 bushels of potatoes. There was considerable difficulty disposing of the surplus over and above domestic requirements.

Some of the surplus was shipped to the United States, and some was stored in Canada. The surplus was shipped to the United States, and some was stored in Canada.

Consequently, the Canadian Government introduced import-export regulations. Some of the surplus was shipped to the United States, and some was stored in Canada.
